

Public letter to people and Mehran Tavakoli Keshe

At Keshe Foundation Spaceship Institute in Desenzano del Garda, Italy, Earth, in spring 2014:

I have been there to help and learn to advance in good ways useful for humanity

I have witnessed good and bad

I have been taught by and experimenting with Mehran Tavakoli Keshe in externally seemingly true, but internally false way from him

I have met good and bad people

I have got friends too

I have seen wonderful nature of Lago di Garda

I have experienced unfulfilled promises of Mehran Tavakoli Keshe

I have been at generous bankets, meetings and Mehran Tavakoli Keshe's family dishes

I have been sleeping in furnitureless room on a bare mattress and my friend too

I have been missing my family

I have lost my energy, time, job and too much money for false promise and Mehran Tavakoli Keshe does not care about me, like with others

I have seen how eyes of Mehran Tavakoli Keshe are dead and missing light

I have ... too many to describe shortly, I could write a whole book

I am not perfect yet, I have my good and bad sides, but trying to perfect myself each day and minimize hurting others, but help them. It is hard, it is worth doing, it is pleasure after all ...

The false story of Keshe Foundation still continues.

After all, visionary, politician, false messiah, false technologist and sad dark soul Mehran Tavakoli Keshe gave me good life lecture, but has lost himself, because what really counts in this wonderful Creation of our Creator is inner light and love towards the Creator, ourselves and others - the inner heat of moral people.

Let any good technology and knowledge only serve towards this inner human clarity on our way towards spiritual home.

I forgive You Mehran Tavakoli Keshe all the bad You have done towards me and thank You for Your good deeds I have met.

We all can get better if we decide to do so and that is also why I have left these stones of farewell at SSI for all of us.
